Solar Mounting Systems for Pitched Roofs

NordMount+ Highlights

Efficient Installation

The already prepared system components and the click installation process enable a significant reduction in installation time.

Adjustment

The height-adjustable center and end brackets and roof hooks provide perfect adjustment during installation.

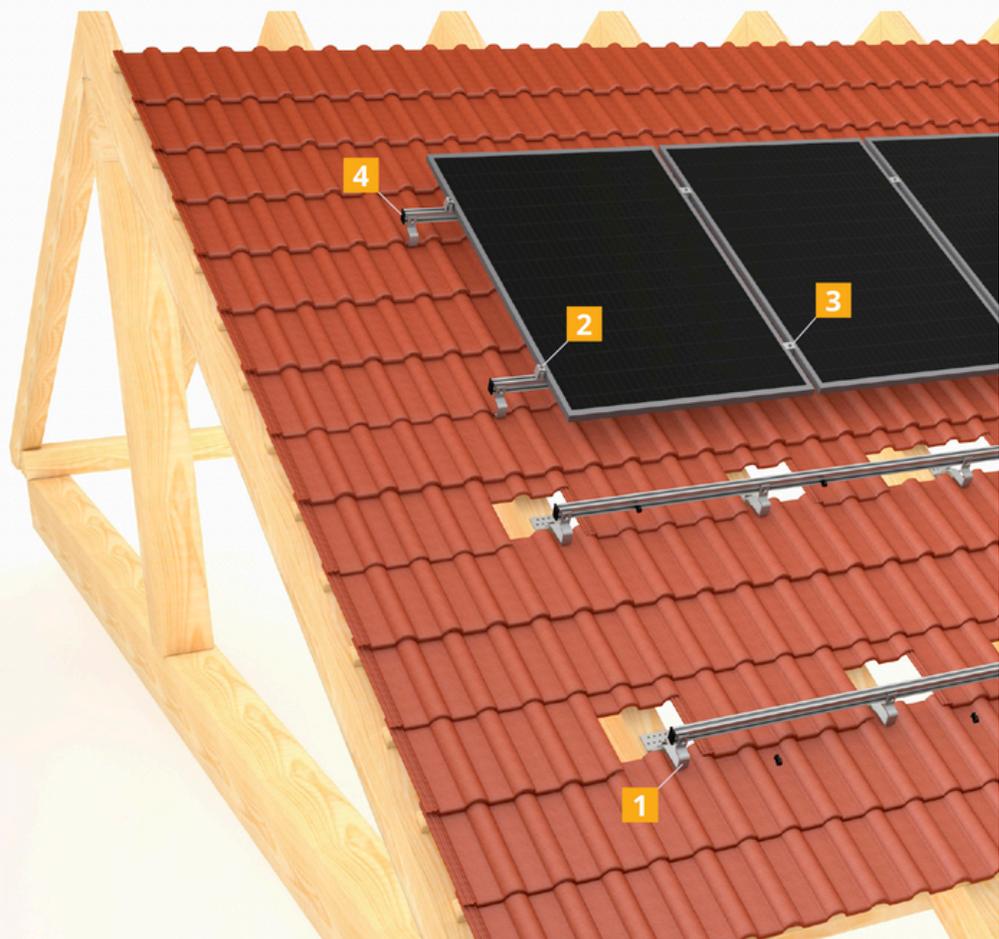

Longevity

The system elements are made of high-quality aluminum or stainless steel of class A2, which ensures excellent corrosion resistance.

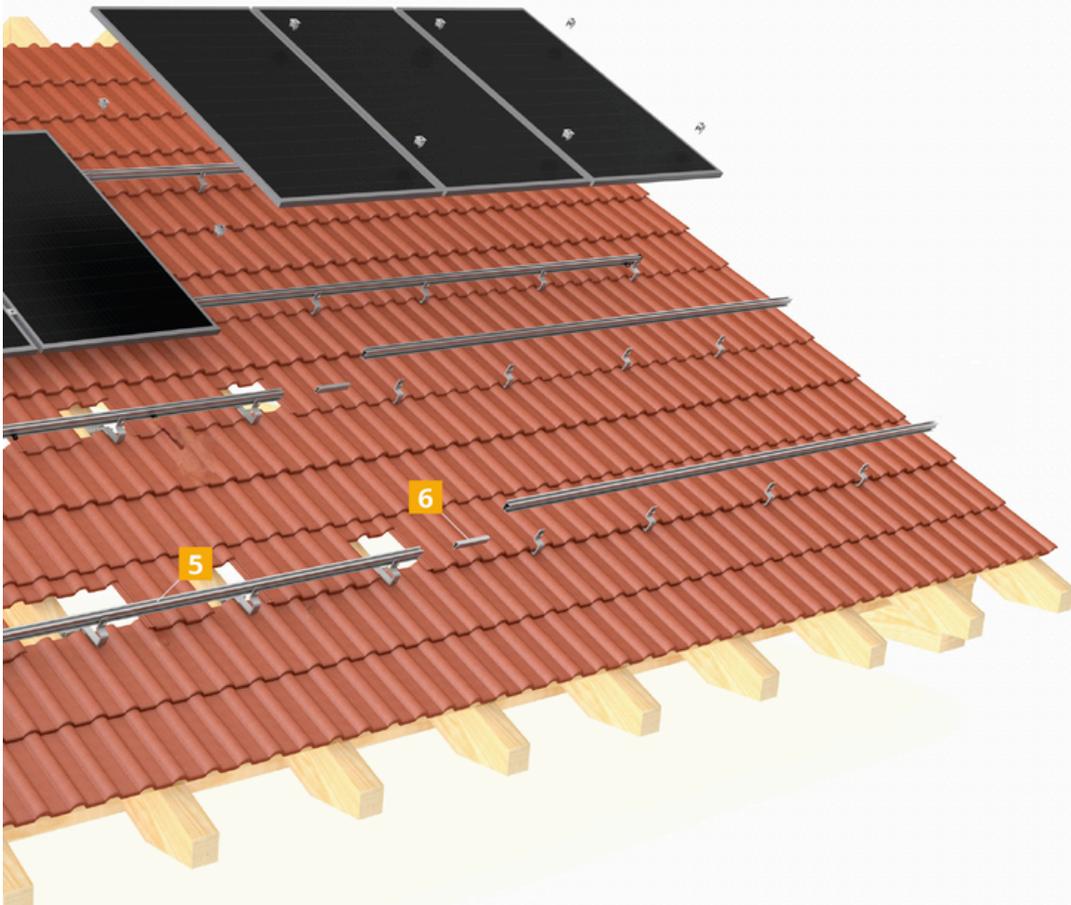

Flexibility

By using the rail connector, extended and precise system alignment is possible.

Mounting System NordMount+

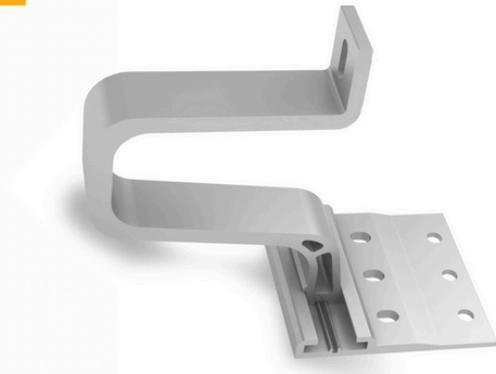

Mounting System NordMount+

Components Details

1

Roof Hook

Adjustable aluminum roof hook (EN-AW 6063 T66) inclusive M8x30 hammer head screw & A2-70 locking nut and bolt

Item No. SO-026

2

End Clamp

Aluminum end clamp for framed PV modules with click system

Item No. SO-018

3

Mid Clamp

Aluminum middle clamp for framed PV modules with click system

Item No. SO-017

Component Details

4

End Cap

Plastic end cap for closing the rail ends

Art.-Nr. SO-008

Mounting Rail

Aluminum mounting rail
(EN-AW 6063 T66)
in different lengths

Art.-Nr. SO-771

5

Connector Rail

Connector rail made of aluminum
(EN-AW 6063 T66)
Plug connection for the
Mounting rail

Art.-Nr. SO-021

6
